

ASET Annual Report 2024-25

A Warm Good Morning to One and All.

Today, I am privileged to present before you a gist of major activities, achievements, developments took place in our college. As you are all aware, I joined as Principal of this institution in the month of July 2024 and prior to that I was the principal of NSS Engg. College, Palakkad. The big eco campus here made a good impression during my visit to KTU Techfest in February 2024 and when I got a call from Chairman of Ahalia group, I decided to join as part of Ahalia campus.

Ahalia School of Engineering and Technology, established in 2012, briefly called as ASET is B++ by NAAC accreditation. The big campus, as you all have witnessed in all these years helped and gave confidence to management to host KTU Techfest in February 2024 when nearly 4500 students from all engineering colleges visited ASET for participating various competitions, project exhibitions etc. This technical event boosted the morale of our students, provided them avenues to showcase their skill and this was first of its kind post Covid 2019 .

The college added one additional course – B.Tech. Artificial Intelligence and Machine Learning in the academic year 2024-25 duly approved by AICTE and KTU and this course is much sought after by students nowadays. Though we are now NAAC B++ institution, the management wants to continuous upgradation in keeping with modern market demands, we are going ahead with NBA accreditation for two courses – B.Tech. ECE & B.Tech. CSE.

The preparations are in the final stage for submission. Also I am very delighted and proud to inform you that we have appointed 5 Ph.D scholars as faculty members in 2024 and one existing faculty, Dr. Aneesh S was awarded Ph. D in May 2024. We are the one and only private engineering college in the district of Palakkad with 14 Ph.D scholars as academicians. To motivate both our staff and students to excel and enrich academic excellence, every staff and student is motivated to NPTEL course and recently good number of them got enrolled and completed the course. 90 new Computers are purchased and we are establishing one additional computer lab to cater to need of B.Tech. AI & ML. NFE student chapter for ASET, the first of its kind in India, was inaugurated by Hon. Minister of Electricity on 26th October 2024. Shortly, NFE will establish a safety lab in ASET which has much industrial potentation. ASET added one additional building adjacent to this for dept. of CSE.

Come to Sports, we hosted University Kho-Kho Championship apart from regular region wise competitions, and three ASET students qualified for University team. We are building new facilities in Sports ground to encourage students and regular training in Cricket, Football and various disciplines are arranged and even trainers are hired for this purpose.

We hosted a number of FDP, workshops, Technical talks in 2024 and nearly one third of our faculty participated various FDPs organized in other institutions. The IEDC of ASET conducted various entrepreneurship oriented programs and hosted technical quizzes, hackathon regularly and good number of students are now part of IEDC activities.

From Academic year 2024-25, we are planning to impart training to ensure students got placement and well trained in personality development. This year we arranged training for

two batches and next year onwards, it will be compulsory for all batches. Also to take care of students' wellbeing in all aspect, counselling staff is appointed and permanently posted in the college. The councillor is instructed to interact students regularly and provide all help and assistance needed to remain cheerful. All eligible students in the recently passed 2020-24 batch got placed in various companies and Ahalia group also recruited a good number of them. The graduation ceremony was held on 15th August and Mr.Pankaj Vasisht, Chairman and Managing Director, Instrumentation Pvt. Ltd.was the Chief guest.

Our college has got maximum number of admission of first year students in the year 2024 since its inception in 2012. We understand the growing number of student strength increase our responsibility and we assure you that regular updation of facilities both infrastructure and academic oriented needs will be met. Both Onam and Christmas were celebrated in grand style, enjoyed by all our students.
